

## **ISG closes 2017 exceeding 15 million euros.**

06 February 2018.

The holding company [Solar International Group Ltd. \(ISG\)](#) presents the results of 2017 achieving the targets set earlier this year and prospects for 2018 very ambitious. Since the Board of Directors expressed their satisfaction with these results in the first year of operation in Spain.

### **Results ISG Group.**

The two Catalan subsidiaries of ISG (Catwatt and Tamesol), are responsible for these results.

[Tamesol](#), solar panel manufacturer, acquired by ISG in 2016, capitalizes much of this success, with 80% of group turnover in countries like Turkey, Argentina, Morocco or USA. Only 5% of its turnover belongs to the domestic market.

[Catwatt](#), dedicated to the development and installation of solar projects has already established itself in its first year, making facilities in countries such as Argentina or Turkey.

### **2018 forecasts.**

ISG is under financing of different projects available in its pipeline, mainly in countries like Argentina, Turkey or Morocco.

Since the board is reported that there are currently agreements to double the figure of 2017, and have confidence that they can overcome the 50 million in 2018.

### **About Solar International Group Ltd. (ISG)**

Solar International Group Ltd. (ISG), whose main objective is to promote international photovoltaic projects; manages all phases of the project, from development and legalization, along with engineering and construction management, through the execution - installation, and finishing with the operation and maintenance of solar farms.

These projects offer different yields ranging between 10 and 20% annually depending on the country, conditions and project size.

Today ISG group companies have participated in the execution of solar projects that exceed the figure of 500MW.
